Reviewer-1	<ol style="list-style-type: none"> This research to obtain the most influential factors produced can be used by planning consultant on wastewater treatment plants scheduling construction project activities to achieve higher efficiency and effectiveness. In Figure 2 the Environmental Performance Index (EPI) Indonesia is still ranked 133 out of 180 countries in the world with EPI 46.92. Methodology is a process or set of rules to be followed in calculations or other problem-solving operations. Overall, It may include step by step in this paper. Paper can be accepted borderline.
Reviewer-2	<ol style="list-style-type: none"> Researchers found that the construction of a wastewater treatment plant in Indonesia to deal with domestic wastewater discharges has experienced many delays. It is true that as the population increases, the threat of decreasing water quality due to wastewater disposal remains a global problem. Paper is good, covers all steps of proposed methodology and defined properly can see at Figure 4. Please check the results again, correct if there are errors. Paper can be accepted.
Reviewer-3	<ol style="list-style-type: none"> The underlying problem for conducting this research is that the problem of environmental damage is currently a major problem throughout the world. The data processing method at the Figure 11 is good enough. The 10 most influential factors of the utilization of the line of balance and M-PERT scheduling method integration consists of combining 1 group activities. Paper accepted.
