The screenshot displays the IEEE Xplore Digital Library interface. At the top, there is a notification for 'Scheduled System Maintenance' on Tuesday, December 18, from 1:00-5:00 PM ET. Below this, the site's navigation bar includes 'IEEE Xplore Digital Library', 'Institutional Sign In', and the IEEE logo. A search bar is present with the text 'Enter keywords or phrases (Note: Searches metadata only by default. A search for "smart grid" = "smart AND grid")'. The main content area shows the article title 'Design of Small Smart Home system based on Arduino' with 2 authors: Andi Adriansyah and Akhmad Wahyu Dani. It indicates 12 paper citations and 3333 full-text views. The abstract states: 'Smart Home is applied in order to provide comfort, energy efficiency and better security. Smart Home System is still rarely used in Indonesia because of the cost and the difficulty of getting the device. The objective of this paper is to offer a Small Smart Home System designed and created by utilizing WLAN network based on Arduino microcontroller. The system is able to monitor and control lights, room temperature, alarms and other household appliances. Results from testing the system show proper control and control monitoring functions can be performed from a device connected to a network that supports HTML5.' Metadata includes: Published in: 2014 Electrical Power, Electronics, Communications, Control and Informatics Seminar (EECCIS); Date of Conference: 27-28 Aug. 2014; Date Added to IEEE Xplore: 08 January 2015; INSPEC Accession Number: 14841520; DOI: 10.1109/EECCIS.2014.7003731; Publisher: IEEE; Conference Location: Malang, Indonesia.
