**PART B: Reviewer Only****SECTION II: Comments per Section of Manuscript**

General comment:	<i>In general, the paper has shown the academic value of the research. Started from the abstract, introduction and up to the results.</i>
Introduction:	<i>Even though, the title of the paper has indicated that the research area was in time performance upgrade on top structural work of a high rise building construction project . Perhaps in the introduction part needs to mention the scope of research analysis. This is important, since the case study could be seen from the perspective of technical, commercial and some other aspects.</i>
Methodology:	<i>This part has shown the research framework of thinking and the steps taken.</i>
Results:	<i>This is just to answer my curiosity, why the results of the case study obtained optimum duration with a faster completion time of 403 working days to 326 working days of implementation so that the time efficiency of 19% was obtained. But if there is some explanation, perhaps need to be stated in the paper.</i>
Discussion:	<i>The figure 4, shown that implementation of CCPM and BIM 4D on upper structure work. This needs to be explained in the discussion part of the paper.</i>
