Dear Author;

The bank transfer is confirmed;

Your paper needs modification regarding references citation within the paper; kindly correct then return based on the following note:

References citation within the paper need to be reformatted exactly according to the IEEE style (more details can be found in the template; template can be downloaded from the journal site). The author name and year for citation should be removed. The reference number from the references list at the end of the author paper (the references at the end of the paper should be numbered) should be used instead. Example on the correct citation "The authors in [2,3] noted that crushed aggregates having angular to sub-angular shaped". Example on the wrong citation "(nassar,2013) and (Fokianos et al., 2007) noted that crushed aggregates having angular to sub-angular shaped" (nassar,2013).

With Best Regards.
